LU THAI FABRIC
FOR MTM

Lv

Lv

Lu Thai MTM Fabrics are using high quality raw materials like xingjiang long staple cotton, linen, tencel, lycra, merino wool, adopting luxury and fashion pattern designs, after the world-leading dyeing, weaving, finishing, printing processing, enriching fabrics multiple functions such as comfort, breathability, smoothness, sweat absorption, wrinkle free, warmth or cool feeling, ecological and environmental protection. The fabrics could meet customers' personalized demands in all-weather, all-accosion and all seasons, which is the first choice for shirt customization.

LU THAI GROUP

Lu Thai Group is the world's largest supplier of high grade shirt fabrics, with 18% market shares. It's also a international top-brand shirt manufacturer. Lu Thai has vertical industial chains from cotton breeding, planting, spinning, dyeing, weaving, finishing, shirt manufacture to market developing. Lu Thai has cotton field in Xinjiang Province of China, has Design and R&D centre in Milano, Italy and New York, USA. Lu Thai establishes 12 holding subsidiary company, 2 foreign offices and 40 factories in 7 countries, they are China, USA, Italy, India, Vietnam, Cambodia and Myanmar.

The annual output is 220 million meters yarn-dyed fabric, 85 million meters piece dye fabric, 20 million pieces OEM shirts and 300 thousand pieces MTM shirts. 80% of the products are sold to more than 30 countries and regions such as America, European Union, Australia, Japan, Korea, and so forth.

Lu Thai establishes long-term strategic cooperative relationship with international famous brands such as Burberry, Calvin Klein, Thomas Pink, Armani, Hugo Boss OLYMP, UNIQULO.

Lu Thai offers one-stop multinational manufacturing and supplying service, here you will find another solutions to your experience.

CLASSIC

Classic Series

This series are classic cotton fabrics, using long stapled cotton from Xinjiang Aksu, and pima cotton from U. S.A. Fabric patterns and colors fit for daily work and life. Special finishing are added onto fabrics and make them with anti-wrinkle performance. Make the dressing simple and convenient, easy to care, keeping durable shape and appearance.

CASUAL

SMART CASUAL series

Smart Casual is a concept and a lifestyle,
contracted but not simple.
It has distinctive designs, reflecting the exquisite
and comfortable dressing with details.
This series select denim washed fabric and imitation
knitted stretch fabric, making you comfortable, grace,
elegant and with unique personality.

GARMENT DIPPING

GARMENT-DIPPING series

Garment-dipping shirts are sold very well among the MTM business. Mill sews shirts firstly and then does industrial leading non-iron treatment, which remains the fine gas permeability of cotton fibers. What's more, because of shirts seams and auxiliary materials(such as interlinings and threads) are treated together, garment-dipping shirts are always with more better anti-wrinkle performance.

Normally garment-dipping shirts are with water-washing and neutralization process before finished, which makes shirts more greener, healthier compared to other wrinkle free shirts. It avoids the disadvantages such as stiff and matte touching caused by traditional wrinkle resistance treatment.

MORECARE

MORE CARE series

The cotton fiber of MORE CARE series are repaired by special moisture processing, which make washed shirts with good anti-wrinkle effect without ironing. More care fabrics are sold well in domestic and overseas markets, and very popular in many famous international brands and customers.

This series fabrics are weaved with 80s/2 to 120s/2 cotton yarns, which are comfortable and easy to care, can keep durable shape and apparence.

They are high quality shirt fabrics with skin-friendly and natural characters, suitable for all season' s wearing.

LUXURY

LUXURY series

Fabric ' s yarn count determines the true quality of a shirt,

More higher yarn count means more delicate the fabric,
which needs more higher requirements on material quality and
processing technology. Normally it ' s regarded as high yarn count if

yarn count higher than 120s.

The Max. cotton yarn count of LUXURY series can reach 300s,
which is the highest level that can be reached in current industrial mass production worldwide.

LUXURY series adopts the world ' s best long stapled cotton as raw material,
making a scientific matching for different quality of long staple cotton(including thin,
mature Egypt cotton, long, bright Xingjiang Aksu long stapled cotton and elastic American Pima cotton),

to take the advantages of all kinds of cotton. Then with fine pattern designs,

through the world-leading dyeing, weaveing and finishing processing,

the high-yarn, high-density fabrics are more delicate, comfortable, submissive,

sweat absorbing and aesthetic.
